About OWL

Ocean World Lines (OWL) is a modern, maritime transport company that has been successfully established in the market for many years. As a neutral FCL NVOCC (Non-Vessel-Operating Common Carrier), we offer our customers both from forwarding and trading, worldwide, reliable ocean freight services, as well as complete door-to-door transport solutions, designed to meet highest customer requirements.

As a subsidiary of the US-based Pacer International Group, our traditional main activities are the worldwide tradelanes to and from the United States and Canada. Today, we are one of the leading neutral NVOCCs in the world.

Of course, also the Europe-Far East trade (and vice versa) is one of our strengths, like our new, own FCL NVOCC service from Northern Europe to Malta and the Mediterranean. Worldwide, the OWL Group moves a global cargo volume of approx. 150,000 TEUs (Twenty-Foot-Equivalent Unit, 20'-Dry Container).

Over the last years, OWL's service scope has grown simultaneously with the expectations and requirements of our customers. Today, services like inland haulages, customs clearance, warehousing and CFS operations, and last but not least an excellent, customer-focussed IT system, have been our standard services for a long time.

Furthermore, we offer our customers worldwide project and reefer shipments, Ro/Ro and breakbulk shipments, dry and liquid bulk chartering, as well as worldwide cross trades of all kinds.

The success of our work is reflected every day in the satisfaction of our global customer base, which is growing steadily. We would be very happy to welcome you one day as one of these customers. The visit of our website should therefore only be meant as a small incentive to assure yourself soon of our very good service!

Our team and/or one of our agencies in every corner of the world are looking forward to hearing from you!

And now please enjoy your visit on our internet pages.
